RACING LANE LINE

Racing Lane's flow-through design controls water turbulence by allowing wave energy to be dispersed along the length of the lane, creating the optimum environment for the fastest swim times.

Each lane consists of a series of $\phi 120$ or $\phi 150$ mm polyethylene disks and donuts strung on a stainless steel cable. Each of these disks is designed to rotate independently of the others, thereby allowing the wave energy to be absorbed and dispersed along the channel within the lane. Competitor lanes come completely assembled.

Standard Colors - Red, White, Blue, Yellow, Green.

Model	Specification
WL-BYD101	$\phi 150 \times 25$ m
WL-BYD102	$\phi 150 \times 50$ m
WL-BYD301	$\phi 120 \times 25$ m
WL-BYD302	$\phi 120 \times 50$ m
